

## ITN COHERENCE

### YEA - Young Excited Atomix – Meeting Durham 2015

*As part of iCoRD, several events will be organised by the young postgraduate and postdoctoral researchers funded by the ITN COHERENCE. At previous COHERENCE schools and conferences in Pisa, Dresden, and Granada, YEA events were run either before or after the main event and mainly featured talks by the young researchers themselves.*

This time, **the young researchers gave talks during the main conference** and therefore the YEA took a slightly different format. Beyond that, it featured **two sessions of invited talks (6 talks)**, as well as **a careers event for young researchers (Referees: Oliver Morsch and Patrick Leisching)** and **an informal Farewell evening** as iCoRD was the last event organised by ITN COHERENCE.
